Notice: The above information is based on the latest stage of our development and application technology. Due to a multiplicity of different influencing factors, this information – as well as other oral or written technical advises – must be considered as non-binding hints. The user is obliged in each particular case to conduct performance tests, including but not limited to trials of the product, in an inconspicuous area or fabrication of a sample piece. Observation of Technical Data Instruction is mandatory (www.akemi.com).

Some words about ourselves

Kitte, Kleber, Steinfestiger - Kernkompetenz und Premiumqualität von AKEMI®

AKEMI stellt seit über 75 Jahren chemische Produkte her. Die auf der Basis von Polyester- oder Epoxydharz entwickelten Produkte werden seit Jahrzehnten weltweit von Fachleuten zum Verkleben, Füllen und Reparieren von allen erdenklichen Natur- und Kunststeinen verwendet.

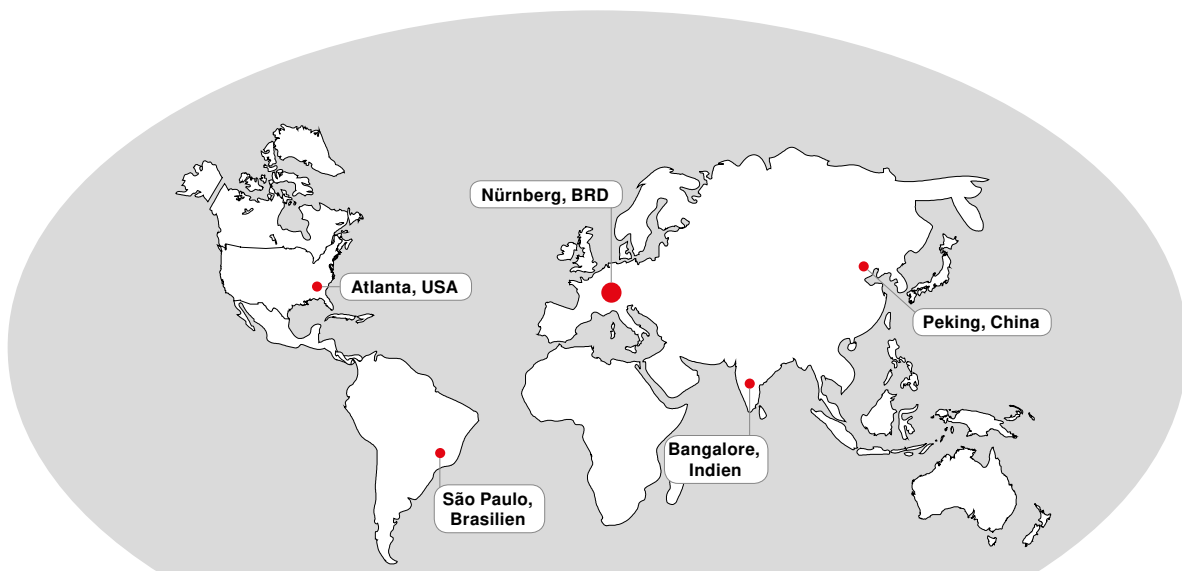

Unsere Produkte erhalten Sie in den unterschiedlichsten, bedarfsgerechten Gebindegrößen. Der perfekt organisierte Service garantiert prompte und zuverlässige Lieferung in über 90 Länder der Erde.

Durch intensive Forschung und Entwicklung wird unser umfangreiches Produktprogramm ständig optimiert und erweitert. Modernste Produktions- und Abfüllanlagen sowie laufende Kontrolle sichern das sehr hohe Qualitätsniveau der **AKEMI**-Produkte.

AKEMI® Kleber und Spachtelmassen sind weltbekannt für ihre extrem hohe Klebekraft, die leichte Verarbeitbarkeit und die hohe Qualität. Unterschiedliche Konsistenzen ermöglichen den Produkteinsatz im horizontalen und im vertikalen Bereich. Eine breite Farbpalette macht die **AKEMI**® Produkte bei den unterschiedlichsten Steinarten anwendbar. Kleber und Kitte mit Strukturpigmenten imitieren die natürliche Steinstruktur, so dass auch größere Kittstellen optisch nicht mehr vom Naturstein zu unterscheiden sind. Mit kristallklaren, vergilbungsfreien Klebern können transparent-kristalline Natursteine wie Thassos, Onyx, Carrara, Palisandro oder Estremoz bearbeitet werden.

der

Principeel onderscheid van de AKEMI-producten op basis van polyester en epoxy

Met een breed productenpallet aan lijmen en kitten voor natuur- en betonhardsteen dekt **AKEMI** het volledige toepassingspectrum in de steenverwerking. De op basis van polyester en epoxyhars ontwikkelde producten worden sinds decennia wereldwijd gebruikt door vaklui voor het verlijmen, vullen en herstellen van alle mogelijke natuur- en kunststenen.

AKEMI-lijm op polyesterbasis

AKEMI lijm en kitten op basis van polyesterhars kenmerken zich in het **Marmorkitt 1000** tweecomponentensysteem door een eenvoudig gebruik, korte uithardingstijd en uitstekende mechanische eigenschappen. Na de doorharding kunnen deze producten tot in hoogglans gepolijst worden.

Door te nuanceren met de overeenkomstige **AKEMI** leurpasta of kleurconcentraat vloeibaar voor polyester kan nagenoeg iedere gewenste kleurtoon verkregen worden.

Daarnaast heeft **AKEMI** ééncomponenten **UV-kitten** evenals driecomponenten **AKS-systeemkitten** voor industriële verwerking in haar programma. UV-kitten dienen voor in slijpstraten voor het dichtsmen van kleine poriën en gaatjes. Deze verhardten onder speciale ultraviolet lichtbronnen binnen korte tijd. Voor industriële verwerking is de AKS-systeemkit best geschikt wegens het hoge vulvolume en de korte uithardingstijd.

AKEPOX®-lijm op epoxybasis

AKEPOX®-lijmen op epoxybasis worden speciaal geconcipeerd voor verwerking buiten.

De lijmen krimpen bij reactie enkel uiterst gering, zijn absoluut weersbestendig en zijn vrij van oplosmiddelen.

AKEPOX®-lijmen onderscheiden zich door hun uitstekende mechanische en chemische eigenschappen, zo dat het mogelijk is, verscheidene materialen zoals steen, hout, glas, metaal en kunststof met elkaar te verlijmen.

Door te nuanceren met de overeenkomstige **AKEMI** leurpasta of kleurconcentraat vloeibaar voor **AKEPOX®** kan nagenoeg iedere gewenste kleurtoon verkregen worden.

Producten op basis van polyester	Producten op epoxybasis
<p>Eéncomponentensysteem: UV-Kitt uitharding door middel van UV-licht</p> <p>Twee componentensysteem: Marmorkitt 1000 uitharding door middel van Peroxid (verharder) Mengverhouding (Kitt:verharder) Normale Marmorkitte = 100 : 1-4 Wasserhell producten = 100 : 1-2 Gebruik van mengtabellen en mengbekers resp. 2-comp. hulzen met mengkoppen</p> <p>Driecomponentensysteem: AKS Systeemkitt uitharding: component I : verharder = 100:6 (voormenging) component II : voormenging = 1 : 1 gebruik in doseersystemen of spachtelautomaten</p>	<p>Enkel tweecomponentensysteem uitharding door precieze dosering van de componenten Mengverhouding (componente A : B) 1:1, 2:1, 4:1 Gebruik van mengbeker of 2-componenten-hulzen met mengkoppen resp. in doseersystemen</p>
Inkleuring enkel met AKEMI polyesterkleurpasta of kleurconcentraat vloeibaar	Inkleuring enkel met AKEPOX® kleurpasta of kleurconcentraat vloeibaar
Verdunnen met Verdunning S	Verdunnen niet mogelijk
Uitharding bij temperaturen vanaf 0 °C	Uitharding bij temperaturen vanaf 10 °C
Korte verwerkingsduur, snelle uitharding	Langere verwerkingsduur, langzame uitharding
Hoge reactiewarmte ook bij dunne lagen	Lage reactiewarmte bij dunne lagen
Reaktief beperkte krimp (2-7 %), afhankelijk van de vulgraad	Zeer geringe reaktief beperkte krimp (0,1 - 0,5%), afhankelijk van de vulgraad, nagenoeg spanningvrij na de uitharding
Lichte vergeling door zonlicht, Marmorkitt Wasserhell en UV Kitt Thassos vergeelen nauwelijks	Vergeling door zonlicht mogelijk, bij AKEPOX® 1005/1006 gering, bij AKEPOX® 5000/5010 uiterst gering
Verlijming enkel droge steenoppervlakken mogelijk, beperkt vorst- en waterbestendig	Verlijming natuurlijk vochtige steenoppervlakken, vorst- en waterbestendig
Geringe alcalibestendigheid	Alcalibestand
Overwegend voor het vullen en spachtelen van natuur- en kunststenen evenals lijmen voor binnen ook met andere materialen (afh. van het systeem vb. hout, metaal, kunststof, glas)	Overwegend voor het consolideren van natuurstenen evenals lijmen van natuur- en kunststenen ook met andere materialen (afh. van het systeem vb. hout, metaal, kunststof, glas) voor binnen en buiten.

Polyester Fillers and Adhesives

Polyester Fillers and Adhesives

Polyester Filler, liquid

POLYLIQUID

liquid stone filler, polyester based

Field of Application:
For glueing and filling natural and artificial stone, suited to fill small and middle size holes or fissures, mainly for work on horizontal surfaces, fast hardening, polishable.

Size	Sales Unit	Art. No.
Colour: transparent 1,05 kg can	6	1 04 82 *
Colour: paglierino light 1,65 kg can	6	1 01 57 *
Colour: white 1,65 kg can	6	1 01 55 *
Colour: black 1,65 kg can	6	1 01 54 *

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:
Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

Dimensioni della confezione	Unità di spedizione	Numero articolo
Colore: honiggelb 150 ml Dose	24	1 07 09
900 ml Dose	6	1 07 01
4500 ml Eimer	1	1 07 03

Marble Filler 1000 Transparent Waterclear Liquid

liquid, crystal clear stone adhesive which hardly yellows

Field of Application:
Used for bonding and filling light-coloured and white, transparent-crystalline natural stone such as Thassos, Carrara, Onyx, Palisandro, Estremoz.

Size	Sales Unit	Art. No.
Colour: transparent 900 ml can	6	1 07 20 **

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:
Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

Dimensioni della confezione	Unità di spedizione	Numero articolo
Farbe: honiggelb 150 ml Dose	24	1 07 09
900 ml Dose	6	1 07 01
4500 ml Eimer	1	1 07 03

Polyester Filler, still-flowing

SEMISOFT

still flowing stone filler, polyester based

Field of Application:
For glueing and filling natural and artificial stone, suitable for all natural and artificial stone, fast hardening, polishable.

Size	Sales Unit	Art. No.
Colour: beige LF 215 1,65 kg can	6	1 05 44 *

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:
Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

Dimensioni della confezione	Unità di spedizione	Numero articolo
Farbe: honiggelb 150 ml Dose	24	1 07 09
900 ml Dose	6	1 07 01
4500 ml Eimer	1	1 07 03

* Made in India with German Technology

** Supplied from Germany

*** Hardeners are supplied together with Polyester Fillers and PLATINUM. However, hardeners can be purchased additionally, if needed.

Polyester Fillers and Adhesives

Polyester Adhesives, knife-grade / past-like

POLYSOFT

creamy stone filler, polyester based

Field of Application:

For glueing and filling natural and artificial stone on horizontal surfaces, but also for work on vertical surfaces, fast hardening, polishable.

Size	Sales Unit	Art. No.
Colour: transparent 1,05 kg can	6	1 04 81 *
Colour: LF 218 1,65 kg can	6	1 10 64 *
Colour: paglierino light 1,65 kg can	6	1 01 53 *
Colour: paglierino dark 1,65 kg can	6	1 01 52 *
Colour: white 1,65 kg can	6	1 01 51 *
Colour: black 1,65 kg can	6	1 01 50 *

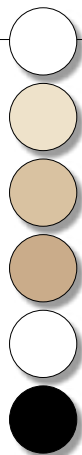

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:

Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

Dimensioni della confezione	Unità di spedizione	Numero articolo
Farbe: honiggelb 150 ml Dose	24	1 07 09
900 ml Dose	6	1 07 01
4500 ml Eimer	1	1 07 03

Marble Filler 1000 Transparent L-Special Waterclear

a gel-like, knife-grade filler which hardly yellows, does not change its consistency by stirring, keeps its stability even in case of higher temperatures

Field of Application:

For bonding and filling light-coloured and white, transparent-crystalline natural stone such as Thassos, Carrara, Onyx, Palisandro and Estremoz in a vertical position. Also for modelling corners and edges.

Size	Sales Unit	Art. No.
Colour: milky 900 ml can	6	1 07 22 **
10 kg bucket	1	1 07 29 **

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:

Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

CLEAR**

AKEMI PLATINUM
Premium Epoxyacrylate Adhesive

CLEAR KNIFEGRAD
• for gluing and filling of stone surfaces
• very fast initial strength

AKEMI PLATINUM
Premium Epoxyacrylate Adhesive

CLEAR FLOWING
• for gluing and filling of stone surfaces
• very fast initial strength

KLAR FLÜSSIG
• zum Kleben und Füllen von Steinen
• sehr schnelle Festigkeit

CLAIR LIQUIDE
• pour colle et remplir les fissures
• adhésion rapide

PLATINUM - Premium Epoxyacrylat Adhesives

PLATINUM liquid

transparent clear adhesive (very light basic colour), based on epoxyacrylate, high bonding power, very fast surface drying and processability

Field of Application:

Excellently suitable for bonding and filling of natural and artificial stones (s.a. marble, granite, artificial stone, terrazzo, engineered Stone) for horizontal applications. Additionally qualified for reinforcement of stone slabs with glass fiber products (laminating) and making stone substitutes by using crushed rock and sand.

Size	Sales Unit	Art. No.
900 ml can	6	1 07 26 **

Marmorkitt 1000 Transparent

EVERCLEAR - Premium PUR Adhesives

EVERCLEAR

FOREVER CLEAR!

EVERCLEAR - Premium PUR Adhesives

EVERCLEAR 100 - liquid

2C-PUR-system, interieur use: zero yellowing, exterieur use: nearly no yellowing, no bleeding of treated stone, free of solvents, to colour with AKEMI® colouring pastes or colouring concentrate liquid for polyester

Field of Application:

For high-quality bonding or filling of light-coloured, white or transparent-crystalline stones like Onyx, Thassos, Sivec, Carrara Marble, Statuario. For filling of holes and fissures as well as surface improvement of natural stones. For horizontal stone bondings.

Size	Sales Unit	Art. No.	Dimensioni della confezione	Unità di spedizione	Numero articolo

Colouring Concentrates (liquid) for Polyester Fillers, PLATINUM and EVERCLEAR

Colouring Concentrates (liquid) for Polyester Fillers, PLATINUM and EVERCLEAR

Colouring Concentrate liquid

for adhesives based on polyester and epoxyacrylate

Field of Application:

Used for colouring Marble Filler 1000, PLATINUM (epoxy-acrylate adhesive) and EVERCLEAR (PUR adhesive) to match the colour of the filler with that of the respective stone. The liquid consistency makes it easier to mix the colouring concentrate with liquid products.

Marmorkitt 1000 Transparent

AKEPOX® - Epoxy Fillers and Adhesives

AKEPOX® - Epoxy Fillers and Adhesives

Epoxy Resins (Stone Strengtheners), extra-liquid

AKEPOX® 1004

low viscosity, 2-component filler (4:1), hardening time approx. 24 h (20°C), easy to colour, free of solvents, weather-resistant

Field of Application:

High penetration into fine and deep cracks. Fills small holes and finishes at the same time the surface of the stone. Especially recommended for multi-coloured and dark stone. Facilitates industrial mass production because almost no odour nuisance arises during application.

200 kg Component B	1	1 13 95 *

Marmorkitt 1000 Transparent

dünnflüssiger, honigfarbener Steinkleber

Einsatz:
Zur Verklebung von Natursteinplatten, zum Verstärken von Natursteinplatten mit Glasfaserprodukten (Laminieren) und zum Herstellen von Gesteinsersatzmassen mit Gesteinsmehl und Sand.

Dimensioni della confezione	Unità di spedizione	Numero articolo
Farbe: honiggelb		
150 ml Dose	24	1 07 09
900 ml Dose	6	1 07 01
4500 ml Eimer	1	1 07 03

AKEPOX® 1016 - Micro Filler

ultra-liquid 2-component stone strengthener (3:1), hardening time approx. 18-24 h (20°C), low odour, easy to colour, free of solvents, weather-resistant

Field of Application:
Generalist due to transparent colour, for natural stone, concrete or concrete ashlar. Very slow hardening and excellent penetration into fine fissures. Closes fine hair cracks and micro fissures and finishes at the same time the surface of the stone.

Size	Sales Unit	Art. No.
Colour: transparent

Epoxy Adhesives, liquid

AKEPOX® 2005

laminating resin 3+3, liquid, 2-component adhesive (2:1), easy to colour, free of solvents, weather-resistant, certified by the German Institute for Building Construction (DIBT)

Field of Application:
For manufacturing of steps (treads) for bolt-connected and stringer stairs made of hewn stone or either reaction resin or cement-bound cast stone. Used in conjunction with a GRP roving fabric. High adhesion on slightly humid stone. Approved by German Institute for Building Construction (DIBT) under the number Z-50.1-323.

AKELUX Stone Repair System

AKELUX Stone Repair System

AKELUX Kit

AKELUX Stone Repair System BASIC

beginner-set based on UIV-technology in a small portable case of elegant design.

Contents:

AKELUX LED-Light Emitter BASIC Art.-No. 6 20 61,
2 x 3 ml Filler Transparent liquid Art.-No. 6 20 01,
2 x Dental Spikes Art.-No. 6 20 34,
Primer Art.-No. 6 20 13,
Silicone Abrasive Cloth Art.-No. 6 20 26,
Polishing Paste Art.-No. 6 20 29,
Transparent Film Art.-No. 6 20 31,
Planer Art.-No. 6 20 48,
Grinding/Polishing Block Art.-No. 6 20 23,
Cleaner Art.-No. 6 20 14

Field of Application:

Repair of small damaged areas (edges, holes, scratches) on kitchen working tops, counter tops and window sills made of natural and artificial stone (s.a. marble, granite, engineered stone). Enables the stone industry to effect small repair work and thus avoids an additional grinding and polishing process of the complete stone surface. Helps the professional processor of natural and artificial stone to quickly and safely repair small damages, especially if an installation has already been done. The AKELUX filler transparent liquid allows repair work on **a large number** of stones.

Marmorkitt 1000 Transparent

Care Products for Natural Stone

Initial- / basic cleaners

Stone Cleaner

slightly alkaline, highly concentrated cleaning agent. Free of phosphates and lyes, biodegradable, foodsafe (certified by an external German testing institute)

Field of Application:

For the thorough removal of building dirt. Removes layers of stone polish and wax, slight concrete films, oil and grease, soot and tar stains, residues of synthetic paints as well as plaster on all natural and artificial stones such as marble, travertine, terrazzo, granite, brick and cotto slabs, tiles, fair-faced concrete and fine stoneware.

Care Products for Natural Stone

Special cleaners

Impregnation Remover

concentrated, gel-like, highly alkaline cleaning agent, without odour and solvents, biodegradable.
For professional use

Field of Application:

Removes stains caused by impregnations as well as heavy dirt (e.g. residue of lacquers) on natural stone, concrete ashlar and clinker. Suitable for horizontal surfaces (e.g. floors and table tops) and vertical applications (e.g. facades and wall coverings) due to the gel-like consistency.

Size	Sales Unit	Art. No.	Dimensioni della confezione	Unità di spedizione	Numero articolo

Water- and dirt-repellent impregnations

Stone Impregnation

impregnation based on silicone

Field of Application:

Penetrates deep into the stone, makes it water-repellent without impairing the vapour permeability. Protects façades from driving rain, causes water to pearl off and is dirt-repellent.

Size	Sales Unit	Art. No.	Dimensioni della confezione	Unità di spedizione	Numero articolo

Protector

Pre-impregnation, protects against discolouration caused by humidity, facilitates the removal of construction dirt

Field of Application:

Suited to achieve a water and dirt repellent treatment of wall- and floor covering made of absorbent mineral substances s.a. natural and artificial stone (polished ground or rough surfaces of marble, lime stone, granite, gneiss, porphyry, cotto, terrazzo, unglazed ceramic tiles or similar). The treatment is carried out before laying. The product protects from ascending humidity and against soiling resulting from humidity during the construction phase.

Care Products for Natural Stone

Oil-, water and dirt-repellent impregnations

Stain Repellent Nano-Effect

outstanding impregnation on the basis of high-quality, organic substances, foodsafe (certified by an external German testing institute). Beginning of protective effect (20°C): 10-20 min

Field of Application:

A special impregnation which strongly repels water, grease and oil. Used to protect flooring, table tops and working surfaces made of absorbent natural and artificial stone (s.a. marble, Solnhofen stone, sandstone, fine stoneware). For indoors and outdoors. Prevents the stone from staining spots or makes removing of spots much easier, the stone remains capable of breathing. The protective effect already begins after some minutes and is fully effective after 2-3 hours. Normally the colour of the stone remains unchanged. Special substances work against a laminar wetting through liquid drops. Ball-shaped liquid pearls which lie only selectively on top of the stone surface, run off the surface.

Colour intensifying impregnations

Colour Intensifier

impregnation which intensifies colour shades extremely well, foodsafe (certified by an external German testing institute). Beginning of protective effect (20°C): approx. 24 h

Field of Application:

Weather-resistant product with a long-term effect for indoors and outdoors. It produces a wet look without a glossy shine. It repels water and dirt and is particularly suitable for rough and absorbent natural and artificial stones.

Size	Sales Unit	Art. No.	Dimensioni della confezione	Unità di spedizione	Numero articolo

Care Products for Natural Stone

Colour intensifying impregnations

Darkener Super

impregnation which intensifies colour shades extremely well. Beginning of protective effect (20°C): approx. 24-48 h

Field of Application:

Weather-resistant product with a long-term effect for indoors and outdoors. Especially suited for colour enhancement of dark and black stone (such as Nero Assoluto, Impala black and Galaxy). Weather-resistant product with a long-term effect for indoors and outdoors. Damaged areas (e.g. hairline cracks) can be treated. The surface thus obtains a homogeneous appearance. Especially suited for fine ground and polished stones.

Sealing of Natural Stone

Stone Sealer satin finish

sealer which contains solvents and high-grade acrylic resins. It is weather-resistant and non-yellowing

Field of Application:

The colourless acrylic coating provides long-term protection and is water and dirt-resistant. It is used to seal porous and absorbent surfaces. Colours and structures appear more intensive. On account of the sealed surface, the stone is easier to care for. Preferably used indoors.

Size	Sales Unit	Art. No.

Care Products for Natural Stone

Sealing of Natural Stone

Super-Gloss

high-gloss lacquer made of high-quality synthetic resins and waxes, very strong colour intensification, stable to yellowing, fast drying

Field of Application:

For re-working of rough, ground, porous and absorbent natural and artificial stone surfaces. Especially suited for surfaces on which mechanical polishing is difficult or impossible due to their condition or position, e.g. edges, corners, reliefs, statues, frescos, columns or borders.

Size	Sales Unit	Art. No.

Care Products for Natural Stone

Surface Treatment of Natural Stone

Liqui Polish Marble

high-tech suspension made of inorganic polishing substances which enables the use of one single product for several polishing steps. Fluid, creamy and homogeneous consistency

Field of Application:

Ready-to-use polishing fluid for machine application used to increase the lustre of polished soft stone. The lustre of edges, draining boards and small surfaces can easily be finished. Reliefs, tombstones, balustrades can be polished. The product is used in the industrial production and suitable for brightening up already laid flooring. Application also on surfaces with residual moisture. For light soft stone, s.a. limestone (travertine), marble and onyx.

Silicone Sealants

Silicone Sealants

Marble Silicone

1-component joint-sealing material on the basis of silicone rubber which hardens in contact with atmospheric humidity. No discolouration in the contact area, fungicidal properties, tear-fast, neutral cross-linked. Storable for 12 months

Field of Application:

Especially for expansion and connecting joints. For use with natural and artificial stone such as marble, granite, quartzite, sandstone, terrazzo and the like. Adheres very well to plaster, ceramics, glass, wood, many metals and plastic. Also for expansion and connecting joints in underwater areas in swimming pools, sauna, public showers as well as pressure vessel construction (with the exception of structure and matt colours). Not suitable for drinking water tanks and aquariums!
